

SUNDEEP CHAMARTHI

Kuala Lumpur, Malaysia | +60 11-3381 8870 | ch.sundeeep72561@gmail.com

PROFILE SUMMARY

Senior Software Developer / Backend Tech Lead with 11+ years of experience in designing and developing enterprise applications across Banking, Financial Services, Telecommunications, Government, Insurance, and Logistics domains. Expertise in Java (8–21), Spring Boot, Microservices, REST/SOAP APIs, Kafka, and distributed system architecture. Strong experience in backend system design, API integrations, database optimization, CI/CD, Azure cloud deployment, and production support. Proven ability to lead backend development, mentor teams, and deliver scalable, secure, and high-performance enterprise solutions.

CORE SKILLS

Languages: Java (8, 11, 17, 21), SQL, PL/SQL, JavaScript

Frameworks: Spring Boot, Spring Cloud, Microservices, Struts, REST APIs, SOAP Web Services

Messaging & Integration: Kafka, Event-Driven Architecture, WSDL, API Integration, JSON/XML Processing

Databases: PostgreSQL, MySQL, Oracle (PL/SQL), MongoDB

Frontend Technologies: HTML, CSS, Bootstrap, JSP, JSTL, Ajax, JavaScript

Cloud & DevOps: Azure, Azure App Services, Azure PostgreSQL, Azure Store Account, OpenShift, Kubernetes, CI/CD, GitHub Actions, Jenkins, Docker

Tools: Git, Bitbucket, SVN, Jira, SonarQube, Maven, Swagger/OpenAPI, Postman

Testing & Monitoring: JUnit, Mockito, Log4j, SLF4J, Production Support, Performance optimization

PROFESSIONAL EXPERIENCE

YM Global Technologies – Kuala Lumpur

Senior Software Developer / Microservices Developer

Client: 73Strings / OCBC Bank | Mar 2023 – Apr 2026

Project: 73Strings – Enterprise Equity Valuation Platform

Description: Enterprise financial valuation and analytics platform supporting valuation processing, financial modelling, reporting workflows, and investment analysis for private equity firms.

Responsibilities

- Designed and developed high-performance Java 21 Spring Boot microservices for financial valuation workflows.
- Built REST APIs and backend services for Excel-based financial plugins and reporting systems.
- Optimized PostgreSQL and MySQL queries to improve valuation processing performance.
- Managed Azure App Services, PostgreSQL, Storage Accounts, and environment-based deployment configurations.
- Led and mentored a team of 6 developers in designing and delivering enterprise-grade Java Spring Boot microservices and financial valuation workflows.
- Implemented CI/CD deployments and maintained code quality using JUnit, Mockito, and SonarQube.

Technologies / Tools: Java 21, Spring Boot, Microservices, PostgreSQL, MySQL, Azure, Bitbucket, Devtron, SonarQube, Jira.

Client: OCBC Bank

Projects: CDI-CCRA, OBAO, GI Rewards System

Description: Enterprise banking platforms supporting online business account opening, credit report integrations, and cross-border rewards processing across multiple ASEAN regions.

Responsibilities

- Developed scalable Spring Boot microservices for digital banking and rewards processing platforms.
- Designed secure REST APIs integrating with 35–40 enterprise systems including GovTech, Core Banking, and Internet Banking.
- Integrated Kafka-based asynchronous messaging for distributed banking workflows.
- Optimized JPA/Hibernate persistence layers and SQL queries for high-volume transaction processing.
- Collaborated with DevOps, QA, and business teams in Agile environments while supporting OpenShift and CI/CD deployments.

Technologies / Tools: Java, Spring Boot, Microservices, Kafka, PostgreSQL, Redis, OpenShift, Kubernetes, Bitbucket, SonarQube, Spring Batch.

Lenovo PCCW Solutions – Kuala Lumpur

System Analyst (Client: StarHub)

Oct 2020 – Mar 2023

Project: StarHub Telecom Systems

Description: Enterprise telecom platform supporting mobile, broadband, billing, subscription, and digital services for millions of telecom customers.

Responsibilities

- Designed and developed scalable Java Spring Boot microservices for telecom business operations.
- Developed REST APIs and optimized backend integrations for distributed enterprise systems.
- Implemented JPA/Hibernate persistence layers and optimized SQL/PLSQL queries for better performance.
- Led technical discussions, code reviews, and mentored junior developers on microservices best practices.
- Implemented CI/CD deployment processes and monitored application performance in production environments.

Technologies / Tools: Java, Spring Boot, Microservices, PostgreSQL, Oracle, Jira, CI/CD.

ICREST SDN BHD – Kuala Lumpur

Senior Software Developer (Client: CIMB Bank)

Aug 2019 – Oct 2020

Project: CAPS (CIMB Application Portal System)

Description: Internal enterprise portal supporting business operations, workflow management, and employee services across multiple ASEAN regions.

Responsibilities

- Developed enterprise applications using Java, Struts, and JSP MVC architecture.
- Designed and optimized Oracle SQL and PL/SQL queries and stored procedures.

- Improved application performance and supported critical banking workflows.
- Provided production support, bug fixing, troubleshooting, and deployment support.
- Collaborated with business users and technical teams for application enhancements.

Technologies / Tools: Java, Struts, JSP, Oracle SQL, PL/SQL, WebLogic, Tomcat, SVN, Git, Jenkins.

SYNERGY LOGIN SYSTEMS SDN BHD – Kuala Lumpur

Senior Software Developer (Client: JPN)

Oct 2018 – Sep 2019

Project: CASTS / EJPN / Immigration Integration System

Description: Government identity and immigration integration platform supporting MyKad, MyKid, online registration, and applicant verification services.

Responsibilities

- Developed backend applications and SOAP web services for secure government integrations.
- Integrated IPT300 device functionality for MyKid chip data processing.
- Optimized Oracle SQL/PLSQL queries and backend processing performance.
- Provided production support and real-time issue troubleshooting.
- Managed SVN repositories and deployment support activities.

Technologies / Tools: Java, Spring Boot, Struts, SOAP, WSDL, Oracle SQL, PL/SQL, SVN, Jenkins, WebLogic.

ACURA TECHNOLOGIES – Kuala Lumpur

Software Developer

Sep 2016 – Oct 2018

Projects: Takaful Insurance / WorkSpez

Description: Enterprise insurance workflow and cloud-based accounting platforms supporting policy management, claims processing, and financial accounting operations.

Responsibilities

- Developed insurance and accounting applications using Java, Spring Boot, Struts, and JSP.
- Implemented Oracle SQL and PL/SQL procedures for transaction processing.
- Developed REST APIs and responsive UI components for enterprise applications.
- Supported production issues, debugging, and application performance optimization.
- Collaborated with business stakeholders for requirement gathering and enhancements.

Technologies / Tools: Java, Spring Boot, Struts, REST APIs, Oracle, MySQL, HTML, CSS, JavaScript, Jenkins.

KWINIT IT SERVICES – Hyderabad, India

Java Developer

Jun 2015 – Sep 2016

Project: Emirates Shipping Line (ESL)

Description: Enterprise shipping and logistics platform supporting booking, billing, scheduling, container tracking, and shipping operations.

Responsibilities

- Supported and monitored production applications built using Java, Struts, and JSP.
- Investigated and resolved production incidents and application issues.
- Performed RCA analysis and optimized application performance.
- Analyzed logs and supported issue troubleshooting activities.
- Collaborated with support and business teams for application enhancements.

Technologies / Tools: Java, Struts, JSP, Oracle SQL, PL/SQL, Log4j, SVN, Tomcat.

EDUCATION

Bachelor of Technology – JNT University Anantapur
